I am a diligent, hard-working software engineer, knowledgeable in various web technologies, a true team player that is eager to learn and adapt to different situations and seeking the opportunity to provide outstanding solutions to people in a collaborative environment.

## Work Experience

### Software Developer Intern - Kreateng Africa

Mar 2022 - Aug 2022

- I designed, developed and maintained websites, software products and in-house tools with React Js and node js.
- Implemented various data structures in backend codebases using PHP to optimize API performance.
- Wrote and revised Business Requirement Documents, User Manuals, API documentation and FAQ's on existing applications.
- Tutored in coding bootcamps and collaborated on developing a syllabus.

### Software Engineer - Alert Group

Jan 2024 - present

- Designed, developed and deployed internal software for real-time handling and tracking of customer complaints enquires, improved performance by implementing logging and reports feedback.
- Built scalable and secure microservices using php and laravel for bills payment API integrations, set up a CI/CD pipeline with github and created documentation to support collaborators.
- Revamped the websites of the organization using the react framework NEXTjs, tested performance and set up deployment workflows using vercel and VPS hosting.
- Streamlined the process of credit appraisals by working with loan officers and stakeholders to build an end to end software solution to completely eliminate all paper processes, used AWS for asset storage.
- Performed quality assurance testing for the mobile applications and existing software and gave recommendations based on analysis.

## Education

### Covenant University - Otta, ogun, Nigeria

Sep 2019 - Aug 2023

- Bachelor of Science, Management Information System
- Second Class Upper
- Member of the Nigeria Association of Computer Science Students (NACOSS)
